

**Frontline Health and Social Care Worker seasonal
influenza vaccine campaign**

**Regional Peer Vaccinator Training
Recommendations for
Influenza Vaccine**

Written by:

Dr Jillian Johnston, Ms Alison Quinn

PHA Health Protection Immunisation Team

2018/19 Version 11th July 2018

Introduction

Healthcare practitioners from a wide diversity of professional backgrounds give immunisations in many different settings. In recent years the flu vaccine has been administered to frontline Health Care Workers (HCWs) by other health care workers that work in the same Health and Social Care (HSC) Trust or organisation (**Peer Vaccinators**). Evidence shows improved uptake with the use of peer vaccinators due to increased accessibility of the vaccine. Peer vaccinators need to be appropriately qualified and trained so they are confident, knowledgeable and up to date as this is important in achieving high vaccine uptake.

The [Public Health England \(PHE\) National Minimum Standards and Core Curriculum for Immunisation Training](#), approved for use in Northern Ireland, sets out standards and essential topics that should be incorporated into immunisation training for registered healthcare practitioners with a role in immunisation. New and update training is recommended and should be tailored to suit the immunisers specific area of practice and the vaccine(s) delivered.

The purpose of this document is to provide clear advice to HSC Trusts on minimum training requirements for Peer Vaccinators in Northern Ireland to enable delivery of flu vaccine to other staff working in the same Trust. These are regional recommendations by the PHA Immunisation Team as there are no nationally agreed training standards specifically for Peer Vaccinator during the seasonal flu programme. However, the PHE document recommends that “*training should cover all the topics in the core curriculum but be context and vaccine specific*”. Each topic from the core curriculum has therefore been adapted in the context of the flu programme. Resources that will enable achievement of the competencies are included at the end of the document.

Peer vaccinator training should be provided at local level by the HSC Trust so that it captures local variation in programme implementation, clinical governance and record-keeping. Training can be a combination of e-learning, face to face and self-directed reading. Annual updates should be undertaken for all peer vaccinators to ensure their knowledge and practice remains current.

Peer Vaccinator training requirements for working in Northern Ireland Health and Social Care Trusts

Core knowledge topic	Learning objectives (LO)	Resources that will achieve LOs:
1. Aim of immunisation and national flu vaccine policy	<ul style="list-style-type: none"> • explain aims of immunisation • describe national and regional flu vaccine policy • describe history of flu vaccine programme, including when frontline HCWs were included in programme • understand why and how the flu vaccine uptake is monitored in local Trusts and in Northern Ireland • access relevant professional materials 	<ul style="list-style-type: none"> • PHA Seasonal Flu training PowerPoint slides for 2018/19 • E-learning for Healthcare (e-LfH) immunisation programme module '<i>national immunisation policy and programmes</i>' • Flu chapter in Green Book • Annual seasonal flu programme letter
2. Immune response to vaccines and how vaccines work	<ul style="list-style-type: none"> • understand immune response to vaccines • describe how vaccines provide individual and herd immunity 	<ul style="list-style-type: none"> • e-LfH immunisation programme module '<i>immunology</i>'
3. Influenza disease	<ul style="list-style-type: none"> • describe and recognise main features of influenza, the nature and frequency of acute and long-term complications 	<ul style="list-style-type: none"> • PHA Seasonal Flu training PowerPoint slides for 2018/19 • Flu chapter in Green Book
4. Types of flu vaccine, their composition, indications and contraindications	<ul style="list-style-type: none"> • knowledge of different types of flu vaccines used, including those not offered to HCWs • know flu vaccine composition • indications and contraindications 	<ul style="list-style-type: none"> • PHA Seasonal Flu training PowerPoint slides for 2018/19 • Annual seasonal flu programme letter • Flu chapter in Green Book
5. Current issues in immunisation	<ul style="list-style-type: none"> • general awareness of current issues and controversies in immunisation and the impact they can have on uptake • be familiar with issues related to flu vaccine (mismatch, vaccine effectiveness, reduced response in elderly) 	<ul style="list-style-type: none"> • PHA Seasonal Flu training PowerPoint slides for 2018/19 • Flu fighter's myth-buster information and clinical evidence
6. Communicating with HCWs about vaccines	<ul style="list-style-type: none"> • Understand factors that influence decision-making • Communicate key facts about flu vaccines and be able to respond to questions/concerns • Tailor the information to the individual • Provide information leaflets and direct to reliable sources of information 	<ul style="list-style-type: none"> • PHA Seasonal Flu training PowerPoint slides for 2018/19 • e-LfH immunisation programme module '<i>communicating with patients</i>' • Flu fighter's myth-buster information and clinical evidence

7. Legal issues in immunisation	<ul style="list-style-type: none"> • Explain principles of valid consent • Reason for good communication and documentation • Explain Patient Group Directions (PGDs) and Patient Specific Directions (PSD) • licensing of vaccines and off-label use 	<ul style="list-style-type: none"> • e-LfH immunisation programme module '<i>legal aspects</i>' • HSC Clinical Education Centre, anaphylaxis and PGD training
8. Storage and handling of vaccines	<ul style="list-style-type: none"> • Describe what cold chain is and why important • Understand and follow correct procedures for storage and handling of vaccines • Manage breakdowns of cold chain – who to inform and action to be taken 	<ul style="list-style-type: none"> • e-LfH immunisation programme module '<i>vaccine storage</i>' • Trust cold chain policy
9. Correct administration of vaccines	<ul style="list-style-type: none"> • Appropriate selection and preparation of flu vaccine • Safe practice in checking the vaccine to be administered • Ability to check suitability for vaccination prior to administration • Correct administration technique for the vaccine to be given (intra-muscular) • Knowledge and practice of infection prevention & control • Sharps management 	<ul style="list-style-type: none"> • PHA Seasonal Flu training PowerPoint slides for 2018/19 • E-learning module 'vaccine administration'
10. Anaphylaxis and adverse reactions	<ul style="list-style-type: none"> • Anaphylaxis and basic life support training according to Trust policy 	<ul style="list-style-type: none"> • HSC Clinical Education Centre, anaphylaxis and PGD training • Trust anaphylaxis policy
11. Documentation, record keeping and reporting	<ul style="list-style-type: none"> • requirements and importance of accurate documentation • where and why vaccine should be recorded and reported • local Trust policy for reporting and recording vaccine errors and incidents 	<ul style="list-style-type: none"> • E-learning module 'vaccine administration' • Trust agreement of recording of vaccines • Trust incident reporting policy
12. Strategies for optimising immunisation uptake	<ul style="list-style-type: none"> • barriers and obstacles that can prevent uptake • understand factors affecting uptake - accessibility, attitudes of staff to vaccination • <i>understand critical importance of healthcare professional confidence in vaccination</i> 	<ul style="list-style-type: none"> • PHA Seasonal Flu training PowerPoint slides for 2018/19

E-learning for Healthcare (e-LfH)

This general immunisation e-learning programme has been written by Public Health England, in collaboration with Public Health Agency. It is compatible with Health and Social Care email addresses. It consists of knowledge sessions with assessment.

Those new to immunisation should complete sessions:

- National immunisation policy and programmes
- Immunology
- Communicating with patients and parents
- Legal aspects
- Vaccine storage
- Vaccine administration

Available at: www.e-lfh.org.uk/programmes/flu-immunisation/open-access-sessions/
