FOOTNOTE: Age-specific fertility rate is the number of live births occurring to a particular woman of a particular age or age group per year, normally expressed per 1,000 women

Total Period Fertility Rate (TPFR) is the average number of children that would have been born to a cohort of women who experienced throughout their childbearing years, the fertility rates of the calendar year in question.

FOOTNOTE: Age-specific fertility rate is the number of live births occurring to a particular woman of a particular age or age group per year, normally expressed per 1,000 women

Total Period Fertility Rate (TPFR) is the average number of children that would have been born to a cohort of women who experienced throughout their childbearing years, the fertility rates of the calendar year in question.

FOOTNOTES: **Perinatal mortality rate:** Number of stillbirths and deaths in the first week of life per 1,000 live and stillbirths per annum (including non Northern Ireland residents).
Neonatal mortality rate: Number of deaths in the first four weeks of life per 1,000 live births per annum (including non Northern Ireland residents).
Post neonatal mortality rate: Number of deaths after the first four weeks but before the end of the first year per 1,000 live births per annum (including non Northern Ireland residents).
Infant mortality rate: Number of deaths in the first year of life per 1,000 live births per annum (including non Northern Ireland residents).
The Stillbirth (definition) Act 1992 re-defined stillbirths, from 1 October 1992, to include losses between 24 and 27 weeks gestation.

FOOTNOTES: **Perinatal mortality rate:** Number of stillbirths and deaths in the first week of life per 1,000 live and stillbirths per annum (including non Northern Ireland residents).
Neonatal mortality rate: Number of deaths in the first four weeks of life per 1,000 live births per annum (including non Northern Ireland residents).
Post neonatal mortality rate: Number of deaths after the first four weeks but before the end of the first year per 1,000 live births per annum (including non Northern Ireland residents).
Infant mortality rate: Number of deaths in the first year of life per 1,000 live births per annum (including non Northern Ireland residents).
 The Stillbirth (definition) Act 1992 re-defined stillbirths, from 1 October 1992, to include losses between 24 and 27 weeks gestation.

FOOTNOTE: *ICD = International Classification of Diseases (10th Revision).
 In 2001, ICD10 classification of diseases was introduced to replace ICD09. There was a change in the selection rules between ICD09 and ICD10 and this had a significant effect on the way pneumonia and bronchopneumonia were coded and therefore there has been a fall in the number of deaths from these causes since the implementation of ICD10 in 2001.
 Rates are per 100,000 population
 All rates are standardised to the revised 2001 home mid year estimate

FOOTNOTE: *ICD = International Classification of Diseases (10th Revision)

In 2001, ICD10 classification of diseases was introduced to replace ICD09. There was a change in the selection rules between ICD09 and ICD10 and this had a significant effect on the way pneumonia and bronchopneumonia were coded and therefore there has been a fall in the number of deaths from these causes since the implementation of ICD10 in 2001.

Rates are per 100,000 population. All rates are standardised to the revised 2001 home mid year estimate

FOOTNOTE: Rates have been calculated using registered births as a denominator.
The definition of a stillbirth changed on 1/10/92 and now includes loss of foetus after 24 weeks of pregnancy
The data does not include cases where the foetus was born dead before 24 weeks of pregnancy

FOOTNOTES: Uptake data are normally calculated by screening unit and are not routinely available at LCG level. Therefore the data shown have been calculated using slightly different methodology to that normally used by the QARC. The standard is $\geq 70\%$ with a target of 80%.
N/A refers to where either the postcode was missing, incomplete or inaccurate therefore no LCG could be assigned.
