

# HSC Safety Forum

The HSC Safety Forum was created in 2007 to support HSC organisations as they strive to provide safe, high quality care. The HSC Safety Forum:

- works collaboratively with stakeholders to assist the drive for improvement in safety and quality in Health and Social Care;
- helps service providers build and develop their quality improvement capability in line with internationally recognised theory and practice;
- facilitates engagement between patients, clients, commissioners and service providers in order to promote safety and quality.

The HSC Safety Forum uses a variety of facilitative approaches, which include:

- enhancement of knowledge on safety, quality and improvement science within the HSC system;
- providing exposure to nationally and internationally recognised experts in the field;
- acting as a conduit for the sharing of best practice;
- hosting collaborative working;
- directly supporting improvement initiatives within HSC organisations.

## Contact information

The HSC Safety Forum has its headquarters at the Public Health Agency in Linenhall Street, Belfast, BT2 8BS.

Office contact: Erin McKinley. Email: [erin.mckinley@hscni.net](mailto:erin.mckinley@hscni.net) and Tel: 028 9536 1789.

### Personnel

**Dr Mark Roberts, Clinical Director**

Reportedly, the Native Americans had a saying: The most important

thing in this life is to be a good ancestor. I want us to continue to build on the work of our predecessors and help pass on an even better organised, more effective and person-centred health and social care system.

Dr Jackie McCall, Clinical Lead

Janet Haines-Wood, Regional Patient Safety Advisor

Levette Lamb, Regional Patient Safety Advisor

Dawn Clarke, Office Manager

Joanne McCloskey, Personal Secretary/Admin Support
