

To advance our priorities and objectives, the Public Health Agency (PHA) procures or grant funds a range of services and initiatives to improve health and wellbeing outcomes and address health inequalities.

This portal contains information on procurement and grant funding opportunities, along with associated specifications and guidance.

If you are interested in procurement and grant funding opportunities with the PHA, please review this portal regularly and take note of any timescales set for responses.

The PHA welcomes responses from all interested parties, large or small, whether community, voluntary, or private, provided they meet the identified requirements and demonstrate their ability to deliver the expected benefits.

To view current grants and tender opportunities or archived information please click the appropriate sections below.

[Changes in PHA advertising of funding opportunities](#)

The PHA will no longer advertise funding opportunities in regional or local newspapers.

The PHA will advertise social care tender opportunities and grant funding awards on its website <https://www.publichealth.hscni.net/funding-opportunities>

Accessing application documentation

Grant funding opportunities - providers will be able to access the appropriate application documentation directly from the PHA website.

Social Care Procurements - providers will be directed to the procurement web portal eTendersNI, at <https://eTendersNI.gov.uk> Potential service providers should familiarise themselves with the eTendersNI portal and register as soon as possible. The 'Suppliers new to eTendersNI' section of the website provides guidance on registering and learning how to navigate the eTendersNI portal as well as selecting the tender you wish to bid for.

The link below provides detailed information on the preparation and submission of tenders through the online e-Tendering system. Please read this guide carefully before preparing a tender response.

<https://etendersni.gov.uk/epps/cft/downloadInfoItem.do?documentId=3051903>

Common Procurement Vocabulary (CPV) codes - When providers first register on the portal there is an option to choose a Common Procurement Vocabulary (CPV) code(s) that they are interested in. We would advise you to select a broad range of CPV codes in the first instance and filter/refine at a later stage. The system will then notify you via email when tenders relating to your chosen CPV codes are advertised. However, it is still advisable to check the portal regularly for tender opportunities.

Note - The Public Contract Regulations set out the CPV codes which are relevant to Health and Social Care Services; the full list of CPV codes can be downloaded from <https://simap.ted.europa.eu/cpv> in an Excel form.
