

Delivering Care aims to support the provision of high quality care which is safe and effective inhospital and community settings, through the development of a framework to determine staffing ranges for the nursing and midwifery workforce in a range of major specialities.

The attachments below detail the policy framework for different care settings, as well as strategic direction and rationale for generaland specialist medical and surgical adult in-hospital caresettings, and using the Framework for general and specialistmedical and surgical adult in-hospital care settings.
