

Background
The primary objective of evidence based research is to improve patient care. This objective is achieved by the synthesis of research of the quality of research of all available research. The synthesis of research of all available research is the primary objective of evidence based research. The synthesis of research of all available research is the primary objective of evidence based research.

Objectives
The primary objective of evidence based research is to improve patient care. This objective is achieved by the synthesis of research of the quality of research of all available research. The synthesis of research of all available research is the primary objective of evidence based research.

Methods
The primary objective of evidence based research is to improve patient care. This objective is achieved by the synthesis of research of the quality of research of all available research. The synthesis of research of all available research is the primary objective of evidence based research.

Results
The primary objective of evidence based research is to improve patient care. This objective is achieved by the synthesis of research of the quality of research of all available research. The synthesis of research of all available research is the primary objective of evidence based research.

Conclusions
The primary objective of evidence based research is to improve patient care. This objective is achieved by the synthesis of research of the quality of research of all available research. The synthesis of research of all available research is the primary objective of evidence based research.

Keywords
The primary objective of evidence based research is to improve patient care. This objective is achieved by the synthesis of research of the quality of research of all available research. The synthesis of research of all available research is the primary objective of evidence based research.
