

Perinatal and Maternal Mortality report

The findings in this report are based on stillbirths and neonatal deaths with a date of birth between 1 January 2008 and 31 December 2008 notified to AWPS/CMACE and reported to the Office for National Statistics (ONS). For maternity provider rates, denominators are based on live births reported to AWPS/CMACE by hospitals. For country rates, denominators are based on live births reported to ONS and NISRA-GRO.

Perinatal mortality rates for 2008 are assigned to a geographical area. Country specific findings are derived using maternal postcode of residence. Findings for maternity providers within Northern Ireland are derived using the place of death, and any deaths at home are allocated to the maternity provider that provided the care at the time of death.
