Health and Social Wellbeing Improvement

The Quit Kit promotional materials were developed as part of the smoking cessation campaign which highlights the range of support available and reinforces the message that quitting is achievable with the right support and motivation. Support highlighted in this part of the campaign includes the smoking support services, GP/pharmacy support, web site www.want2stop.info and a Quit Kit.

Individuals can request a free Quit Kit by completing a Quit Kit flyer, which can be picked up in GP practices, pharmacies and voluntary organisations, or by submitting the online form at the website www.want2stop.info
