## [Health Protection](#)

The following suite of nine leaflets for patients and visitors to healthcare settings include information on healthcare associated infections, C. difficile, MRSA, norovirus, scabies, ESBL resistant bacteria, multi-drug resistant bacteria and laundry and hand hygiene guidance.

The below documents are all available as pdfs and in accessible formats. Accessible formats are alternatives to printed information, used by people who are blind or visually impaired. These accessible formats include HTML, audio and braille. For audio and HTML copies please click on the links below. For braille copies please contact Caroline McGeary on 0300 555 0114.

- [Hand hygiene](#)
- [Norovirus leaflets](#)
- [Laundry advice](#)
- [MRSA Leaflet](#)
- [Clostridioides difficile](#)
- [Scabies](#)
- [Extended spectrum beta lactamase \(ESBL\) resistant bacteria](#)
- [Multi-drug resistant \(MDR\) bacteria](#)
- [Healthcare Associated Infections](#)

Two additional leaflets are also available as pdfs on Carbapenemase Producing Enterobacteriaceae/Carbapenemase Producing Organism (CPE/CPO). The first is a patient information leaflet and the second is for patients being screened for CPE/CPO.

- [CPE/CPO Patient information leaflet](#)
- [CPE/CPO Screening information leaflet](#)

Two leaflets on Urinary Tract Infections in older people and Urinary catheter care are also available to download:

- [Urinary Tract Infections in older people](#)
- [Urinary catheter care](#)

## Details
