[Health Protection](#)

This leaflet is for pregnant women who have been diagnosed with hepatitis B. It provides information on the care pathway for these women, including referral to a liver specialist, the vaccination course for the newborn child, and long-term protection from the infection. It has been updated to include new advice on immunisation of babies from 1 August 2017.

PDFs of the leaflet are also available in 15 languages.

Printing instructions are provided in a PDF below.

Details

Format

4 page A5; PDF only

Target group

Pregnant women with hepatitis B
