[Health and Social Wellbeing Improvement](#)

The Needle and Syringe Exchange Service is a free, confidential service available for individuals who inject drugs. Our service aims to help reduce the spread of bloodborne viruses by offering free, sterile injecting equipment and by safely disposing of used items.

This program is designed to ensure the health and safety of the community. You can find details on how the service works, along with contact information for participating pharmacies and local outreach teams, in the updated leaflet.

For the most current list of providers, please refer to Needle and Syringe Exchange Services (list of providers) October 2025 in Downloads section below.

For more information visit [Harm Reduction Services for people who inject drugs](#) page.

## Details

Format
