

This page is for healthcare and other professionals only. Access [Vaccine preventable diseases and immunisation programmes](#) page for public information.

This page provides information, resources, trusted guidance, training and campaign materials to support professionals who are involved in vaccine programmes delivery, education, and public outreach. These users might include:

- Healthcare professionals (GPs, nurses, pharmacists)
- Educators (school staff, teachers, principals, headteachers, administrators)
- Community and voluntary sector workers (youth workers, outreach teams)
- Public health officials
- Care home staff
- Social workers and early years practitioners

Whether you're a healthcare provider, educator, or part of the voluntary or community sector, you find the latest resources, guidelines, and training materials below.

What's new

- Seasonal updates (Flu 2024-25 including pre-school)
- New training modules
- Changes in eligibility or guidance

Guidance and training programme resources:

[Vaccination policy and programme guidance](#)

The following resources and guidelines are for the use of health and social care professionals only. To access public information, visit [Vaccine preventable diseases and immunisation programmes page | HSC Public Health Agency](#).

Who sets vaccination policy?

The Department of Health (DoH) is responsible for developing vaccination policy, based on recommendations from the Joint Committee of Vaccinations and Immunisations (JCVI). The JCVI includes representatives from all Devolved Administrations.

Key reference documents:

- **Policy documents:** [Access national vaccination policy materials](#) on the Department of Health website.
- **The Green Book:** [information for public health professionals on immunisation against infectious diseases](#) provides authoritative guidance on vaccination policy and practice.
- **Vaccine updates:** [Subscribe to vaccine updates - GOV.UK](#)

Programme overview

Childhood vaccination programmes

The following resources and guidelines are for the use of health and social care professionals only. Access [Vaccine preventable diseases and immunisation programmes | HSC Public Health Agency](#) for public information.

Childhood vaccination programmes

Immunisations for infants (aged under 1 year) and children (aged 1-2 years)

- Includes: Diphtheria, tetanus, pertussis, polio, hepatitis B, Hib, MMR, Men B, Men C, pneumococcal, rotavirus, BCG, influenza
- Resources: [Childhood immunisation programme](#)

Pre-school immunisations (aged 2-4 years)

- Includes: Diphtheria, tetanus, pertussis, polio, MMR

Immunisations for 12-13 year old

- Includes: Diphtheria, tetanus, pertussis, polio, MenACWY, MMR, HPV
- [Factsheet on MenACWY immunisation for teenagers](#)
- [Factsheet on HPV vaccine for children in Year 9 and 10](#)
- [HPV vaccine training slides 2019 15_8_19.pptx](#)

Childhood immunisation schedule

Age due	Vaccines that protect against	Vaccine given
8 weeks old	Diphtheria, tetanus, pertussis (whooping cough), polio, Haemophilus influenzae type b (Hib) and hepatitis B	DTaP/IPV/Hib/He (6 in 1 vaccine) - one injection
	Meningococcal group B (MenB)	MenB - one injection
	Rotavirus gastroenteritis	Rotavirus - orally

12 weeks old	Diphtheria, tetanus, pertussis (whooping cough), polio, Haemophilus influenzae type b (Hib) and hepatitis B	DTaP/IPV/Hib/He (6 in 1 vaccine) - one injection
	Meningococcal group B (MenB)	MenB - one injection
	Rotavirus gastroenteritis	Rotavirus - orally
16 weeks old	Diphtheria, tetanus, pertussis (whooping cough), polio, Haemophilus influenzae type b (Hib) and hepatitis B	DTaP/IPV/Hib/He (6 in 1 vaccine) - one injection
	Pneumococcal (13 serotypes) • if received pneumococcal at 12 weeks give Men B	PCV - one injection

Age due	Vaccines that protect against		Vaccine given
One year old (on or after the child's first birthday)	Born before 1 July 2024	Born on or after 1 July 2024	
	Pneumococcal	Pneumococcal	PCV - one injection
	Measles, mumps, rubella	Measles, mumps, rubella	MMR - one injection
	MenB	MenB	MenB - one injection
	Hib/MenC (if Hib/MenC exhausted give DTaP/Hib/IPV/HepB)		Hib/MenC - one injection
18 months	No appointment	DTaP/IPV/Hib/HepB	DTaP/IPV/Hib/HepB - one injection
		Measles, mumps, rubella	MMR - one injection
3 years 4 months old or soon after	Diphtheria, tetanus, pertussis and polio	Diphtheria, tetanus, pertussis and polio	dTaP/IPV - one injection

	Measles, mumps, rubella	MMR - one injection
Boys and girls aged 12 to 13 years	Cancers and genital warts caused by specific human papillomavirus (HPV) types	HPV - one injection
14 years old (school Year 9)	Tetanus, diphtheria and polio	Td/IPV - one injection
	Meningococcal groups A, C, W and Y	MenACWY - one injection
Eligible paediatric age group See annual flu letter	Influenza (each year from September)	LAIV (Live attenuated influenza vaccine • If LAIV is contraindicated or otherwise unsuitable use inactivated flu vaccine (check Green Book chapter 19 for details) - injection or nasal spray

Specific vaccine information

Meningococcal vaccines (MenACWY and Men B) - [Factsheet on MenACWY immunisation for teenagers](#), [Meningitis B immunisation](#)

Pertussis (whooping cough) Includes: Infants, pre-school aged children and pregnant women - [Pertussis \(whooping cough\) immunisation](#)

Rotavirus - [Factsheet on rotavirus immunisation](#)

Selective childhood immunisation programmes schedule

Target group	Age and schedule	Disease	Vaccines required
Babies born to mothers with hepatitis B	At birth, 4 weeks if born before 1 July 2024 give additional dose at one year	Hepatitis B	Hepatitis B (Engerix B/HBvaxPRO)
Infants in areas of the country with TB incidence $\geq 40/100,000$	Around 28 days old	Tuberculosis	BCG Check SCID screening outcome before giving BCG
Infants with a parent or grandparent born in a high incidence country	Around 28 days old	Tuberculosis	BCG Check SCID screening outcome before giving BCG
Children in a clinical risk group	Age under 2 years • if first ever flu vaccine give second dose at 4 weeks	Influenza	Inactivated flu vaccine
	Aged 2 to 8 years • if first ever flu vaccine give second dose at 4 weeks		LAIV • if LAIV contraindicated or otherwise unsuitable give inactivated flu
	Aged 9 to 17 years • only one dose required each flu season		LAIV • if LAIV contraindicated or otherwise unsuitable give inactivated flu
Pregnant women	At any stage of pregnancy during flu season	Influenza	Inactivated flu vaccine
	From 16 weeks gestation	Pertussis	Tdap (ADACEL)
	From 28 weeks gestation	RSV	RSV vaccine (Abrysvo)

Healthcare professionals (e-learning, standards training, PGDs, storage)

The following resources and guidelines are for the use of health and social care professionals only. Access [Vaccine preventable diseases and immunisation programmes | HSC Public Health Agency](#) for public information.

Patient Group Directives (PGDs):

The PHA and Health and Social Care Board (HSCB) PGD Development Group have adapted Public Health England national PGDs for use in Northern Ireland, with their permission. They can be used to facilitate the delivery of Immunizations in HSC, in line with national recommendations.

Currently PGDs for Regional Immunisation Programmes are accessed on the HSCB Integrated Care or Trust Intranet websites.

E-learning modules:

The [e-learning for health \(e-lfh\)](#) general immunisation modules provide training for many of the standards outlined in the National Minimum Standards and Core Curriculum for Immunisation Training for Registered Healthcare Practitioners:

- Immunology & Assessment
- Communicating with patients, parents and carers
- Legal Aspects & Assessment
- Vaccine Storage & Assessment
- Vaccine Administration & Assessment

Health professionals working in Health and Social Care (HSC) in Northern Ireland can access e-lfh immunisation modules with their hscni.net email address.

Standards and core curriculum for immunisation training:

The [National Minimum Standards and Core Curriculum for Immunisation Training for Registered Healthcare Practitioners](#), February 2018, provide minimum standards and the core curriculum for health professionals requiring training in vaccinations.

Immunisation documents previously published by the Royal College of Nursing (RCN) have now been incorporated into this document. The Public Health Agency endorses the advice and recommendations provided.

Vaccine handling and storage guidance for primary care settings:

The PHA and HSCB have jointly produced regional guidance for General Practices for safe and effective [handling and storage of vaccines](#).

[Vaccination coverage reports and statistics on uptake](#)

Statistics on uptake of vaccine programmes

Annual immunisation report

The PHA Immunisation Team publishes the [Annual Immunisation Report](#) at the end of each calendar year. This provides information on vaccine uptake across:

- Preschool immunisation programmes,
- School-based immunisation programmes,
- Adult immunisation programmes in Northern Ireland.

Quarterly coverage reports

[Quarterly reports on vaccine coverage](#) are also available for:

- Preschool vaccine programmes,
- School based vaccine programmes,
- Pregnancy vaccine programmes,
- Elderly vaccine programmes.

Statistics on burden of vaccine-preventable diseases

The [Annual Epidemiology of Vaccine-Preventable Disease Report](#) for the latest calendar year in the first quarter of the following year. This provides information on the burden of vaccine-preventable diseases in Northern Ireland.

Annual immunisation and vaccine-preventable disease reports: [view reports here](#)

Vaccine management system (VMS)

The following resources and guidelines are for the use of health and social care professionals only. Access [Vaccine preventable diseases and immunisation programmes | HSC Public Health Agency](#) for public information.

Vaccine management system (VMS)

The [Vaccine Management System \(VMS\)](#) is a Northern Ireland's system for managing vaccinations. It enables:

- Recording of vaccines by healthcare professional
- Data analysis to monitor coverage
- Online appointment booking for citizens

Social media resources for vaccination programmes

The following resources and guidelines are for the use of health and social care professionals only. Access [Vaccine preventable diseases and immunisation programmes | HSC Public Health Agency](#) for public information.

Access [social media resources for vaccination programmes pages to promote vaccination programmes on your channels](#).

Use the social media assets and messaging below to spread awareness and promote vaccination programmes running in Northern Ireland.
