

Vaccination and immunisation professional resources

This page is for healthcare professionals delivering vaccination programmes in Northern Ireland. Access [Vaccine preventable diseases and immunisation programmes](#) page for public information.

This page provides information, resources, trusted guidance, training and campaign materials to support professionals who are involved in vaccine programmes delivery, education, and public outreach. These users might include:

- Healthcare professionals (GPs, nurses, pharmacists)
- Educators (school staff, teachers, principals, headteachers, administrators)
- Community and voluntary sector workers (youth workers, outreach teams)
- Public health officials
- Care home staff
- Social workers and early years practitioners

E-learning, standards, vaccine handling and storage, PHA portal

The following resources and guidelines are for the use of health and social care professionals only. Access [Vaccine preventable diseases and immunisation programmes | HSC Public Health Agency](#) for public information.

E-learning modules:

The [e-learning for health \(e-lfh\)](#) general immunisation modules provide training for many of the standards outlined in the National Minimum Standards and Core Curriculum for Immunisation Training for Registered Healthcare Practitioners:

- Immunology & Assessment
- Communicating with patients, parents and carers
- Legal Aspects & Assessment
- Vaccine Storage & Assessment
- Vaccine Administration & Assessment

Health professionals working in Health and Social Care (HSC) in Northern Ireland can access e-lfh immunisation modules with their hscni.net email address.

Standards and core curriculum for immunisation training:

The [National Minimum Standards and Core Curriculum for Immunisation Training for Registered Healthcare Practitioners](#), February 2018, provide minimum standards and the core curriculum for health professionals requiring training in vaccinations.

Immunisation documents previously published by the Royal College of Nursing (RCN) have now been incorporated into this document. The Public Health Agency endorses the advice and recommendations provided.

PHA SharePoint immunisation and vaccination training portal:

- [PHA SharePoint immunisation and vaccination training materials portal](#) (organised by targeted programmes, life stages) for healthcare professionals only

Childhood vaccination programmes

The following resources and guidelines are for the use of health and social care professionals only. Access [Vaccine preventable diseases and immunisation programmes | HSC Public Health Agency](#) for public information.

Childhood vaccination programmes

Immunisations for infants (aged under 1 year) and children (aged 1-2 years)

- Includes: Diphtheria, tetanus, pertussis, polio, hepatitis B, Hib, MMR, Men B, Men C, pneumococcal, rotavirus, BCG, influenza
- Resources: [Childhood immunisation programme](#)

Pre-school immunisations (aged 2-4 years)

- Includes: Diphtheria, tetanus, pertussis, polio, MMR

Immunisations for 12-13 year old

- Includes: Diphtheria, tetanus, pertussis, polio, MenACWY, MMR, HPV
- [Factsheet on MenACWY immunisation for teenagers](#)
- [Factsheet on HPV vaccine for children in Year 9 and 10](#)
- [HPV vaccine training slides 2019 15 8 19.pptx](#)

Childhood immunisation schedule

Age due	Vaccines that protect against	Vaccine given
8 weeks old	Diphtheria, tetanus, pertussis (whooping cough), polio, Haemophilus influenzae type b (Hib) and hepatitis B	DTaP/IPV/Hib/He (6 in 1 vaccine) - one injection
	Meningococcal group B (MenB)	MenB - one injection
	Rotavirus gastroenteritis	Rotavirus - orally
12 weeks old	Diphtheria, tetanus, pertussis (whooping cough), polio, Haemophilus influenzae type b (Hib) and hepatitis B	DTaP/IPV/Hib/He (6 in 1 vaccine) - one injection
	Meningococcal group B (MenB)	MenB - one injection
	Rotavirus gastroenteritis	Rotavirus - orally
16 weeks old	Diphtheria, tetanus, pertussis (whooping cough), polio, Haemophilus influenzae type b (Hib) and hepatitis B	DTaP/IPV/Hib/He (6 in 1 vaccine) - one injection
	Pneumococcal (13 serotypes) • if received pneumococcal at 12 weeks give Men B	PCV - one injection
Age due	Vaccines that protect against	Vaccine given

Age Group	Born before 1 July 2024	Born on or after 1 July 2024	Vaccination
One year old (on or after the child's first birthday)	Pneumococcal Measles, mumps, rubella MenB Hib/MenC (if Hib/MenC exhausted give DTaP/Hib/IPV/HepB)	Pneumococcal Measles, mumps, rubella MenB	PCV - one injection MMR - one injection MenB - one injection Hib/MenC - one injection
	18 months	No appointment DTaP/IPV/Hib/HepB Measles, mumps, rubella	DTaP/IPV/Hib/HepB - one injection MMR - one injection
3 years 4 months old or soon after	Diphtheria, tetanus, pertussis and polio Measles, mumps, rubella	Diphtheria, tetanus, pertussis and polio	dTaP/IPV - one injection MMR - one injection
	Boys and girls aged 12 to 13 years	Cancers and genital warts caused by specific human papillomavirus (HPV) types	HPV - one injection
14 years old (school Year 9)	Tetanus, diphtheria and polio Meningococcal groups A, C, W and Y		Td/IPV - one injection MenACWY - one injection

Eligible
paediatric
age group Influenza (each year from September)
See annual
flu letter

LAIV (Live attenuated
influenza vaccine • If LAIV
is contraindicated o
otherwise unsuitable use
inactivated flu vaccine
(check Green Book chapter
19 for details) - injection or
nasal spray

Specific vaccine information

Meningococcal vaccines (MenACWY and Men B) - [Factsheet on MenACWY immunisation for teenagers](#), [Meningitis B immunisation](#)

Pertussis (whooping cough) Includes: Infants, pre-school aged children and pregnant women - [Pertussis \(whooping cough\) immunisation](#)

Rotavirus - [Factsheet on rotavirus immunisation](#)

Selective childhood immunisation programmes schedule

Target group	Age and schedule	Disease	Vaccines required
Babies born to mothers with hepatitis B	At birth, 4 weeks if born before 1 July 2024 give additional dose at one year	Hepatitis B	Hepatitis B (Engerix B/HBvaxPRO)
Infants in areas of the country with TB incidence \geq 40/100,000	Around 28 days old	Tuberculosis	BCG Check SCID screening outcome before giving BCG

Infants with a parent or grandparent born in a high incidence country	Around 28 days old	Tuberculosis	BCG Check SCID screening outcome before giving BCG
Children in a clinical risk group	Age under 2 years • if first ever flu vaccine give second dose at 4 weeks	Influenza	Inactivated flu vaccine
	Aged 2 to 8 years • if first ever flu vaccine give second dose at 4 weeks		LAIV • if LAIV contraindicated or otherwise unsuitable give inactivated flu
	Aged 9 to 17 years • only one dose required each flu season		LAIV • if LAIV contraindicated or otherwise unsuitable give inactivated flu
Pregnant women	At any stage of pregnancy during flu season	Influenza	Inactivated flu vaccine
	From 16 weeks gestation	Pertussis	Tdap (ADACEL)
	From 28 weeks gestation	RSV	RSV vaccine (Abrysvo)

Teenagers immunisation
