

COVID-19 vaccine COVID-19 Vaccinations

A guide for parents of children 6 months to 4 years of age at high risk

Who is at higher risk from COVID-19 infection?

Children at serious risk from the complications of COVID-19 infection include:

- those with severe neurodisabilities
- those whose immune systems don't work as well (immunosuppression)
- those with profound and multiple or severe learning disabilities (including Down's syndrome), and those on the learning disability register
- those with long term serious conditions affecting their health.

Eligible children and young people who are aged 6 months to 4 years should have the COVID-19 vaccinations. Your child's paediatrician will know if they need to have the vaccine.

COVID-19: A guide for parents of children 6 months to 4 years of age at high risk

This leaflet is for the parents of children at serious risk from the complications of COVID-19 infection.
