[Service Development and Screening](#)

This leaflet provides information about cervical screening and the Northern Ireland Cervical Screening Programme. It explains how screening is carried out, who is eligible for screening, what happens at a screening appointment, and how screening samples are processed. It also covers screening test results and the risks and benefits of taking part in the screening programme.

Cervical screening is not a check for other cancers of the reproductive system, such as ovary, womb, vulval or vaginal cancer.

Do not wait to contact a GP if you have any concerns.

Translations into 10 languages and a large print accessible Word version of this leaflet are available below. Please note that the translations are of the 2023 version of the leaflet.

## Details

Format

16 page A5 leaflet

Target group

Women aged 25-64
