[Health Protection](#)

People aged 75 years and older, residents in care homes for older people, and those aged 6 months and over with a weakened immune system will be offered a dose of coronavirus (COVID-19) vaccine this spring.

Who is being offered a spring vaccine?

COVID-19 is more serious in older people and in people with certain underlying health conditions. For these reasons, people aged 75 years and over, those in care homes, and those aged 6 months and over with a weakened immune system are being offered a spring dose of COVID-19 vaccine.

Timing of the spring vaccine

You should be offered an appointment between April and June, with those at highest risk being called in first. You will be invited to have your booster around 6 months after your last dose, but you can have it as soon as 3 months.

If you are turning 75 years of age between April and June, you do not have to wait until your birthday, you can attend when you are called for vaccination.

This latest leaflet supporting the COVID-19 vaccination programme for spring 2024 describes the vaccines, who is eligible and potential side effects.
