Northern Ireland standards for education providers who deliver nurse and midwife cervical screening sample taking programmes

Version: 2.0

Issue date: 15 October 2024

Review date: 15 October 2027

These standards have been developed for education providers in Northern Ireland who deliver nurse and midwife cervical screening sample taking education programmes. They provide details of the theoretical content and practical assessment required within the core education programme, and the theoretical content of the three yearly update programme to prepare students to deliver a comprehensive, person-centred cervical screening service in clinical practice.
