COVID-19 Vaccination Surveillance in Northern Ireland, Autumn 2025

Public Health Agency

28 October 2025

- [1 Summary](#)
- [2 COVID-19 Autumn 2025 Vaccination Campaign](#)
- [3 Eligibility for vaccinations](#)
- [4 Methods](#)
- [5 Supplementary tables](#)

Data were correct at 26 October 2025.

1 Summary

- A total of 69,686 COVID-19 vaccinations have been administered between 01 September 2025 to 26 October 2025 as part of the Autumn 2025 campaign.
- COVID-19 vaccination uptake was highest in care home residents (36.9%) and those aged 75 years and over (39%).

2 COVID-19 Autumn 2025 Vaccination Campaign

The COVID-19 Autumn 2025 vaccination campaign commenced in Northern Ireland on 07 October 2025 and is expected to end on 31 January 2026. The campaign is delivered by a number of providers including GP, community pharmacy and Health and Social Care Trusts. The total number of vaccinations administered to 26 October 2025 was 69,686. Vaccine uptake in Autumn 2025 to date was highest in care home residents (36.9%) and those aged

75 years and over (39%) (Figure 2.1).

Figure 2.1: Cumulative COVID-19 Autumn 2025 vaccination uptake by eligible group in Northern Ireland.

3 Eligibility for vaccinations

The Green Book is published by UK Health Security Agency and provides information for public health professionals on immunisation, including COVID-19 vaccination ([The Green Book | Immunisation against infectious disease](#)). Considering this advice and that of the Joint Committee on Vaccination and Immunisation (JCVI), the Chief Medical Officer in Northern Ireland issues a letter for the COVID-19 vaccination campaign outlining who is eligible for vaccination under the current programme. For more information on the COVID-19 vaccination programme in Northern Ireland, including eligibility for vaccination, please visit [Health NI | Autumn 2025 COVID-19 Vaccination Campaign Campaign](#).

4 Methods

Data is presented to the end of the last reporting week for COVID-19 Autumn 2025 vaccinations, Sunday 26 October 2025.

All vaccinations were recorded on the Northern Ireland Vaccine Management System (VMS).

Data was provisional and accurate at the time of extraction. Data lags exist between data of administration of the vaccine and date of recording on VMS.

Eligible groups are not mutually exclusive and individuals may be counted in more than one group. Individuals may have more than one eligibility criteria for vaccination, however, most will only have one reason for vaccination recorded on VMS. This will impact estimates of

vaccine uptake.

4.1 Definitions and data sources

Vaccine uptake (%) is defined as the number of vaccinations administered (numerator) divided by the eligible population (denominator). Vaccine uptake is included in this report for those eligible groups in which a denominator is available.

COVID-19 Autumn 2025 vaccination is defined as any vaccination recorded on the Northern Ireland Vaccine Management System (VMS) administered from 01 September 2025 to 31 January 2026.

4.1.1 Adult vaccinations by age group

Age for adult vaccinations is based on age at 31 March 2026. The age group based population is based on the NISRA mid-year estimate (2021).

4.1.2 Immunosuppressed individuals

Individuals who are ‘immunosuppressed’ are determined using the reason for vaccination ‘immunosuppressed’, as populated on the VMS. The population who are ‘immunosuppressed’ is determined using data from the national General Practice Intelligence Programme (GPIP) extracted at the beginning of the Autumn 2025 campaign. Vaccine uptake for the adult ‘immunosuppressed’ population is estimated in this report.

4.1.3 Care home residents

Care home residents are those recorded as a care home resident with a valid RQIA care home registration number on VMS. The care home resident population is based on the beds occupied reported in the Northern Ireland RQIA Census of Bed Availability in Registered Care Homes in Northern Ireland (December 2023). Vaccine uptake in care home residents is estimated in this report.

5 Supplementary tables

Table 1: Number of COVID-19 Autumn 2025 vaccinations and cumulative vaccination uptake by eligible group in Northern Ireland.

Eligible group	Number vaccinated	Population
----------------	-------------------	------------

75 years and over	59,174	151,548
18-74 years 'immunosuppressed'	9,396	37,658
Care Home residents	4,976	13,490
