

Protect them on the inside too.

The flu vaccine is now available for all children aged from 2 years old up to and including Year 8 at secondary school.*

- The nasal spray flu vaccine is safe and effective
- It is quick and painless
- It will help protect your child against flu, which can be serious, especially for children with medical conditions
- It can help stop the spread of flu to other people in the family who are at higher risk of flu like babies and grandparents

Go to pha.site/fluspray for more information. Your GP or school nurse should offer your child the vaccine or contact your GP surgery to find out about arrangements in your practice.

* Pre-school children will be offered the vaccine at their GP surgery. School children (up to and including Year 8) will be offered the vaccine at school.

**STAY WELL
THIS WINTER**
