**Notes:** \*Due to the COVID-19 pandemic, all education settings were closed from 23 March 2020 and delivery of 2019-20 immunisation programmes was paused, in line with UK Government COVID-19 guidance. This has had a significant impact on coverage of the HPV vaccination programme in the 2019-20 and 2020-21 academic years.

\*\* From September 2019 the HPV vaccination programme was extended to males aged 12-13 years old. This is the second year that HPV vaccination coverage in Northern Ireland has been presented for both males and females.

## Annual HPV vaccine coverage in Northern Ireland: 2021-22\*

HPV vaccine coverage data of first and second dose for year 10 at August 2022
