Director of Public Health Core Tables 2020

Table 1a:	Estimated home population by age/gender, Northern Ireland 2020	2
Table 1b:	Estimated home population by age band, Health and Social Care Trusts (HSCTs) 2020	3
Table 1c:	Estimated home population by age band, 2014 Local Government Districts (LGDs) 2020	4
Table 2a:	Population projections, 2026 and 2031 and 2020 mid year estimates of population (thousands), Northern Ireland	7
Table 2b:	Population projections, 2026 and 2031 and 2020 mid year estimates of population, HSCTs	8
Table 2c:	Population projections, 2026 and 2031 and 2020 mid year estimates of population, 2014 LGDs	9
Table 3a:	Live births/stillbirths by maternal residence, Northern Ireland 2011-2020	10
Table 3b:	Live births/stillbirths by maternal residence, HSCTs 2020	11
Table 3c:	Live births/stillbirths by maternal residence, 2014 LGDs, 2020	11
Table 4a:	Total births by maternal residence, HSCTs 2011-20	12
Table 4b:	Total births by maternal residence, 2014 LGDs 2011-20	12
Table 5a:	Age specific/total period fertility rates, Northern Ireland, 2011– 2020	13
Table 5b:	Age specific/total period fertility rates, HSCTs 2011 - 2020	13
Table 6a:	Notified live births by maternal residence by birth weight, HSCTs, 2011 – 2020	15
Table 6b:	Notified still births by maternal residence by birth weight, HSCTs, 2009 – 2020	17
Table 7a:	Infant/perinatal death rates, Northern Ireland 2011 – 2020	19
Table 7b:	Infant/perinatal death rates, HSCTs 2011 - 2020	19
Table 8:	Standardised mortality ratios, age 1-14 years, HSCTs, 2016 - 2020	21
Table 9a:	Directly standardised death rates, selected major causes of death age 15-74 years, Northern Ireland 2011-2020	22
Table 9b:	Age standardised death rates (standardised to EU populations), selected major causes of death age 15-74 years, Northern Ireland, 2011-2020	23
Table 9c:	Directly standardised death rates, selected major causes of death age 15-74 years, HSCTs, 2011-2020	24
Table 10a:	Mortality by cause, Northern Ireland 2020	29
Table 10b:	Mortality by cause, HSCTs 2020	30
Table 10c:	Potential years of life lost (PYLL), selected causes of death age 1-74 years, Northern Ireland 2020	32
Table 10d:	Potential years of life lost (PYLL), selected causes of death age 1-74 years, HSCTs, 2020	33
Table 11a:	Life Expectancy at birth, age 1 and age 65 years, Northern Ireland 1900 – 2020	34
Table 11b:	Life Expectancy at birth, HSCTs 2001-03 to 2018-20	35
Table 12:	Infectious disease notifications, Northern Ireland 2011–2020	36
Table 13a:	Percentage uptake rates immunisation, Northern Ireland 2011/12 - 2020/21	37
Table 13b:	Percentage uptake rates immunisation, HSCTs and Northern Ireland 2020/21	38
Table 14a:	Number/birth prevalence per 1,000 total registered births, selected congenital abnormalities, Northern Ireland 2011 – 2020	39
Table 14b:	Number/rate Down's Syndrome births, maternal age, Northern Ireland 2016-2020	39
Table 15a:	Cervical screening coverage, Health and Social Care Trusts (HSCTs) 2020/21	40
Table 15b:	Breast screening uptake rates (three year screening cycle), HSCTs 2018-19 to 2020-21	41
Table 15c:	Abdominal Aortic Aneurysm screening uptake rates, HSCTs, 2019/20	42
Table 15d:	Bowel screening uptake rates, HSCTs, 2020/21	42
Table 16:	Self-harm - number of presentations and persons presenting to Emergency Departments, HSCT of residence, 2019-20	43

Table 1a**Estimated home population by age/gender, Northern Ireland 2020**

FOOTNOTES:

The Stillbirth (Definition) Act 1992 redefined a stillbirth, from 1 October 1992, as a child which had issued forth from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life. Prior to 1 October 1992 the statistics related to events occurring after the 28th week of pregnancy.

Figures do not include births to women living outside Northern Ireland

Birth rate is calculated using total population figure

FOOTNOTE: Percentages may not total 100 due to rounding

Although data is available by single year for each Trust, it cannot be published due to small numbers

The Stillbirth (Definition) Act 1992 redefined a stillbirth, from 1 October 1992, as a child which had issued forth from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life.

Prior to 1 October 1992 the statistics related to events occurring after the 28th week of pregnancy.

This data is sourced from the Child Health System and NI Maternity System. As a result, the data will differ from that published by NISRA which is shown in this report. NISRA presents births registered in a specific year, whereas CHS/NIMATS shows the number of births occurring in a specific year.

FOOTNOTE: ICD = International Classification of Diseases (10th Revision)

Potential Years of Life Lost (PYLL) is a measure of premature death, measured as the number of years of life 'lost' from a death when a person dies before the age of 75. A death at age 25, for example, has lost 50 potential years of life.

Infant deaths under 1 years are omitted as they are mostly a result of causes specific to this age group and have different aetiologies to deaths later in life.

FOOTNOTES: Uptake rates for:

Diphtheria, Tetanus, Pertussis, Polio (IPV), Hib (*Haemophilus influenzae* type b) and Hepatitis B refers to children who have received 3 doses (completed) before their first birthday.

In 2018-19, children born between 01/04/17- 31/03/18 received either the DTaP/IPV/Hib (5-in1) or the DTaP/IPV/Hib/HepB (6-in1) vaccination. The Hepatitis B component was introduced in August 2017.

MenB (Meningococcal group B infection) refers to children who have received 2 doses (completed) before their first birthday. This vaccine was introduced in September 2015.

MenC (Meningococcal group C infection) refers to children who have completed their course before their first birthday. This vaccine ceased in June 2016.

Rotavirus refers to children who have received 2 doses before their first birthday (cannot be given to children 24 weeks or older). This vaccine was introduced in July 2013.

PCV (Pneumococcal Conjugate Vaccine) refers to children who have received 2 doses (completed) before their first birthday. Babies born from 1 January 2020 will be offered 1 dose of PCV at 12 weeks of age and a booster dose at 1 year. Due to this change, PCV 12m data is not available for 2020-21.

Hib/MenC refers to children who received one dose on or after their first birthday and before their second birthday.

MMR1 (Measles, Mumps and Rubella) by age 2 refers to children who received the first dose on or after their first birthday and before their second birthday.

MMR1 by age 5 refers to children who received the first dose on or after their first birthday and before their fifth birthday. MMR2 by age 5 refers to children who received 2 doses on or after their first birthday and before their fifth birthday.

Pre school booster (DTaP/IPV) refers to children who received 4 doses of DTaP/IPV containing vaccines before their fifth birthday.

HPV (Human Papilloma Virus) refers to girls in Year 10 (aged 13-14 years) who have completed their course (3 doses)

School Leavers Booster (DT/IPV) refers to children who have received five doses of Diphtheria/Tetanus/Polio containing vaccine by end of Year 12.

Men ACWY (Meningococcal groups ACWY infections) refers to children who received one dose by end Year 12 (aged 15-16 years). This vaccine was introduced in August 2015.

HPV, School Leavers Booster and Men ACWY uptake data has decreased in Northern Ireland during 2020-21 due to school closures caused by the Covid-19 pandemic which impacted on the delivery of the school based vaccination programmes. As schools across Northern Ireland have now reopened catch up opportunities will take place over the coming months.

HPV, School Leavers Booster and Men ACWY uptake data presented for 2020-21 is therefore provisional.

Uptake of all vaccines to age of five years are presented by financial year April-March

*Uptake of schools based immunisations are presented by academic year - September-August - using Trust resident population (2009/10-2014/15).

All other schools based immunisations are presented by academic year - September-August - using school population.

Table 13b
Percentage uptake rates immunisation, HSCTs and Northern Ireland 2020/21

	HSCT					
	Belfast	Northern	South Eastern	Southern	Western	Northern Ireland
DTaP/IPV/Hib(HepB)	90.3%	96.3%	93.6%	95.8%	96.0%	94.5%

CervicalCheck - The National Cervical Screening Programme (Republic of Ireland): <https://www.hse.ie/eng/cervicalcheck/>

FOOTNOTES: HSC Trust is allocated based on the postcode of the GP practice at which the woman is registered

Target age group used for this programme to calculate coverage is 25-64 years.

Women aged 25-49 are invited once every three years. Women aged 50 to 64 are invited every five years.

The Northern Ireland cervical screening data for 2020/21 covers the period 1st April 2020 to 31st March 2021

Northern Ireland Cervical screening programme now calculates age appropriate coverage data

% Women 25-49 with at least one adequate smear result in the last 3.5 years

% Women 50-64 with at least one adequate smear result in the last 5 years

All invitations for the cervical cancer screening programme were paused from the week beginning 16 March 2020 as part of the HSC response to the COVID-19 pandemic. A phased resumption of invitations for cervical screening began in June 2020, with priority given to women at higher risk of cervical changes. Routine invitations recommenced from August 2020. The programme continues to run with a 5 month delay, as a result of the temporary pause.

Table 15b
Breast screening uptake rates (three year screening cycle), HSCTs 2018-19 to 2020-21

HSC Trust of residence	Number invited	Number screened	%
Belfast	46,981	32,638	69.5%
Northern	43,590	33,130	76.0%
South Eastern	56,749	44,035	77.6%
Southern	45,218	34,360	76.0%
Western	40,915	31,227	76.3%
Northern Ireland	233,453	175,390	75.1%

BowelScreen - The National Bowel Screening Programme (Republic of Ireland): <http://www.bowelscreen.ie/> or National Screening Service: <http://www.cancerscreening.ie/>

FOOTNOTES: The programme was paused end March 2020 due to the pandemic and restarted in August 2020

Uptake is calculated for financial year 2020/21

Please note the method of calculating uptake changed in FY2018/19. Direct comparison cannot be made with data published prior to Core Tables 2018

Number invited to participate refers to eligible population after exclusions have been removed

Excludes non-responding participants who died or emigrated within 6 months of screening invitation or ceased from screening due to no colon present

Participants are given a 6 months compliance period. Kits received after 6 months are not included in uptake

HSC Trust is allocated based on the participant residency postcode at time of reporting Oct 2022

Postcodes not assigned to any HSC Trust at time of reporting were excluded from Trust breakdown but appear in total

NIBCS changed its screening kit type from FOB to quantitative FIT in January 2021

People aged 60 to 74 years are invited every two years

Acceptable uptake target >= 52%

Achievable uptake target >= 60%

Table 16
Self-harm - number of presentations and persons presenting to Emergency Departments, HSCT of residence, 2019-20

	BHSCT	NHSCT	SEHSCT	SHSCT	WHSCT	Northern Ireland

Number of Ideation presentations to hospital

Total	1,525	1,103	722	1,191	1,141	5,682
Male	1,003	681	435	818	661	3,598
Female	522	422	287	373	480	2,084

SOURCE:

Northern Ireland Registry of Self-Harm, Public Health Agency

Further information:

Multicentre Study of Self-Harm in England www.psych.ox.ac.uk/research/csr/ahoj

The National Self-Harm Registry Ireland (National Suicide Research Foundation), Republic of Ireland <http://www.nsrf.ie/>

FOOTNOTES:

The term 'self-harm' was derived from the term 'parasuicide'. The definition of 'parasuicide' was developed by the World Health Organisation (WHO)/ Euro Multicentre Study Working Group as: 'An act with non-fatal outcome in which an individual deliberately initiates a non-habitual behaviour, that without intervention from others will cause self-harm, or deliberately ingests a substance in excess of the prescribed or generally recognised therapeutic dosage, and which is aimed at realising changes that the person desires via the actual or expected physical consequences.'

"The following are considered to be self-harm cases:

- All methods of self-harm i.e. drug overdoses, alcohol overdoses, lacerations, attempted drownings, attempted hangings, gunshot wounds, etc. where it is clear that the self-harm was intentionally inflicted.
- All individuals who are alive on presentation to hospital following an act of self-harm."

Ideation cases involve presentations to the Emergency Department due to thoughts of self-harm and / or suicide where no act has taken place.

Data above is shown by Health Trust of residence and so will differ from figures published previously in Registry of Self-Harm Annual Reports

1 Data for individuals presenting with self-harm to ED: the individual figures for each Trust do not total the Northern Ireland figure. Individuals are counted once in the Northern Ireland total and once for each Trust in which they resided at the time of presentation.

Rates are European Age Standardised Rates (EASR)
