[‡]% in GBMSM[†] represents the proportion of the total male diagnoses attributed to gay,bi-sexual and men who have sex with men (GBMSM)

*Data is confidential. Following recent ONS guidance on data disclosure, the rules on publication of STI data with small cell sizes have changed. Cells with a value between 1 and 4 will now be anonymised with an astrich. In addition, where the anonymised cell can be deduced from the totals, the next smallest cells will also be anonymised.
