

Over 70?

1 in 3 women who get breast cancer are over 70, so don't assume you're past it.

A lump isn't the only sign of breast cancer. If you notice any changes to your breasts, tell your doctor straight away. Finding it early makes it more treatable and could save your life.

After your last invited breast screening you can still be screened every three years. Just phone your local screening unit. For more information visit www.nidirect.gov.uk/breast-screening
